ABOUT THE AWARD

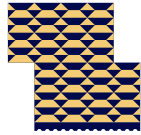

The Prime Minister's Export Award is proud of its achievements of over 32 years by its contribution in helping drive the Thai economy.

PM Export Award was established in 1992 by the Ministry of Commerce, Royal Thai Government, as an honorable accolade to the country's outstanding exporters. The Award's primary objective is to invigorate the Thai economy through brand promotion, and high quality standards in the manufacturing and service industries.

The PM Export Award represents the pinnacle of recognition for entrepreneurs across all product and service categories, encouraging both recipients and aspiring awardees to elevate the quality of their products and service to meet international standards. This prestigious accolade not only bolsters the confidence of Thai exporters by acknowledging their contributions to the production of exceptional products and services but also helps build a positive corporate image for those who have significantly impacted the nation's export sector. The award ceremony, presided over by the Prime Minister, highlights the government's commitment to honoring exporters. Over the past 32 years, the Department of International Trade Promotion has consistently overseen the selection process for these awards.

BEST DESIGN COMMITTEES

FOR PRIME MINISTER'S EXPORT AWARD 2024

DESIGN EXCELLENCE AWARD (DEMARK) was established in 2008 in order to give recognition to outstanding product design. The Department of International Trade Promotion (DITP) receives cooperation from the Japan Institute of Design Promotion (JDP) in determining the judging criteria for DEMARK Award of Thailand, inviting experts to be judges, and also help promote the award to be accepted in the international arena. DEMARK logo is given to winners so that it can be used to promote the products. The DEMARK award winners with the highest scores in each category will receive an honourable Prime Minister's Export Award for Best Design.

During the Establishment of SAHAFARMS

Saha Farms was founded in 1969 by Dr. Panya Chotitawan, Thailand's leading expert in disease prevention and treatment. After dedicating himself to the civil service for over 23 years, Dr. Panya started a new journey by raising only 500 chickens per day and became the first pioneer in chicken export in Thailand.

Vision & Management

Saha Farms was founded by Dr. Panya's commitment to provide high-quality food to humanity. We have continuously developed the business until we became the leading frozen chicken exporter in Thailand. We have high attention to our products and services to ensure that consumers receive the best experience, while developing and maintaining the organization to be sustainable for the good quality of life of our employees.

Product Highlights

Our large, modern factory produces premium-grade chicken, with timely delivery adhering to the global standards. With expert butchery ensure every cut is delicately crafted.

Innovations

We use advanced machinery like Auto Final Control for sanitation, Auto Weighing for accurate packing, and solar energy to reduce our environmental impact.

Established in 2010, Platinum Fruit Co., Ltd. specializes in exporting premium-grade Thai fruits, including durians, longans, mangosteens, and coconuts, to various international markets. Our export destinations include China, India, Indonesia, Australia, and Europe.

With over 30 years of experience in the family business of exporting fruits and vegetables, our executive is driven to develop and expand the fruit export business. Extensive knowledge and expertise are employed to recognize premium-grade produce and understand the life cycle of fruits. The company is committed to sincerity, transparency, and fairness. Our philosophy "Growing Together Fruitfully" aims to build strong relationships with farmers, growers, producers, and business partners to strengthen our business collectively.

Additionally, the company has built a network of farmers, supporting and promoting knowledge to improve fruit quality to meet market

demands. This includes education on soil improvement, irrigation, appropriate fertilizers and nutrients, size sorting, as well as harvesting and post-harvest handling techniques. All fruits come from GAP and Global GAP- certified farms and are processed in certified facilities, meeting HACCP, GMP, GHP, DOA, and Halal standards.

Thus, we guarantee our fruits are premium quality, safe, residue-free, large, and delicious, highly favored in international markets. Our cold chain logistics system ensures that our fruits remain fresh and high-quality throughout the transportation process until they reach consumers.

This commitment is what drives Platinum Fruit Co., Ltd. to develop and promote Thai premium fruit exports to be the best in the global market.

Prolog Titanium Corporation Limited was established with the objective of leading in the production and distribution of all types of titanium metal products to both general consumers and industrial sectors. We aim to be the most comprehensive and dominant entity in Thailand and the largest in the Southeast Asian region, specializing in manufacturing titanium machinery.

Our geographic advantage as a central hub in the region, supported by investment incentives from the BOI for establishing manufacturing facilities in the EEC Special Economic Zone, enhances our competitive edge. We capitalize on highly skilled labor, such as engineers and welders specialized in titanium, with significantly lower costs compared to developed countries like Japan and the United States, enabling us to competitively produce titanium machinery at prices comparable to traditional materials like steel or stainless steel.

Our advanced titanium processing and welding technologies, developed through collaboration with government agencies (such as the NSTDA), have empowered us with the expertise to transform titanium by Thai hands, thereby expanding rapidly into export markets.

Over the past 60 years, King Stella Group Co., Ltd. has been dedicated to developing products that address everyday problems for every family member, covering Air Care, Home Care, Pet Care, Car Care, and Personal Care, under our three main brands: King's Stella, BEARING Petcare, and WaxOne. At King Stella, everything starts with family. Since 1963, our journey began with the question, "Why must we endure unpleasant odors?" This sparked the creation of Thailand's first air freshener spray, specifically designed

to combat odor issues in humid tropical climates. Since then, our guiding principle has always been to design products based on the family's pain points.

"EMPOWERING FAMILY LOVERS" is not just a motto; it is our mission. By prioritizing family care, we identify problems firsthand and solve them with a deep understanding, resulting in innovative solutions for families.

THAI WAH

“Thai Wah Public Company Limited (TWPC) was established in 1947 to buy wolframite, an iron oxide of tungsten. In 1952, the company diversified into the tapioca business and later pioneered the vermicelli business. By 1963, TWPC had become Thailand’s largest exporter of tapioca flour.

The company expanded its cassava plantation operations to northeastern Thailand and was listed on the Stock Exchange of Thailand in 1989. Under the leadership of CEO Mr. Ho Ren Hua,

TWPC has a vision of “Creating innovation and sustainability from farm to shelf” and upholds the values of Pride, Integrity, and Consistency.

TWPC has expanded its business globally and obtained various certifications, including Sustainable Agriculture Initiative (SAI) certification. The company is committed to sustainable agriculture and has also received recognition from government agencies and organizations for its food safety and quality standards.”

K-Fresh Company Limited is a grower, manufacturer, and exporter of Nam Hom coconuts. With a commitment to produce Nam Hom coconuts for the world market with quality, morality, and innovation, K-Fresh selects only the varieties of Nam Hom coconuts from Thailand. It is the only raw material for production, which is the best coconut species in the world. It has a sweet and delicious taste.

Nowadays, the company has more than 10,000 rai of coconut plantations, of which 60% are owned by local farmers and the other 40% are the company's own plantations. We also apply Regenerative Agriculture in our plantation. Also, K Fresh has 2 production plants located in Ban Phaeo District, Samut Sakhon Province. The factories have international standards certified such as GHPs, HACCP, USDA Organic, Halal.

K-Fresh has invented the innovation of ready-to-drink fresh organic Nam Hom coconuts, the Coco Thumb brand, under the concept of "Fresh From Farm in Just One Press" and obtained product design and invention patents in Thailand and internationally. Coco Thumb is convenient, just press and insert into a straw. Consumers will be able to drink organic coconut water, in an environmentally friendly packaging. It is a new experience of drinking fresh coconut, by allowing consumers to drink fresh coconuts conveniently, clean and safe. In addition, Coco Thumb can add value to Thai agricultural products. Coco Thumb creates income for the local communities and the country. With a low cost, a simple production process, and a shelf life of 70 days in refrigeration, which is equivalent to the age of normal fresh stranded coconuts, Coco Thumb can actually be exported on an industrial level.

Youtube : Sonite Official

Sonite Innovative Surfaces Co., Ltd. was founded in 2010. Starting from the discovery and development of materials, Sonite places importance on environmental sustainability. Focusing on developing Eco materials that use recycled materials to be upcycled into various products that are beautifully designed, durable, modern, and practical, such as Mosaics, Tiles, Solid Surfaces, synthetic stones (Sonite Surfaces), Decorative items, home decorations (Sonite Decor), Furniture (Sonite Living)

Material development uses a special type of polymer as the starting material. After that, innovation and design were developed by mixing materials that were leftovers from the agricultural sector, such as rice husk (Husk), coconut fiber (Cocco), and egg shells (E-Marble). Make E-marble products, including waste from the industrial sector such as scrap buttons (Scapa), coffee grounds (Java), or PET bottles that are plastic waste in the sea (Talay) or natural stone (Natural stone) into the polymer. (Upcycle Material) to produce various types of products. The amount of recycled content that the company can produce has strong and durable properties is at a proportion of 30-40 percent. The proportion can be adjusted according to customer needs and Additional research and development

With production innovation that takes into account the reduction of greenhouse gasses and the least Carbon Footprint release, we try to push and extend the principles of BCG or Bio Circular Green Economy. Sonite has received standard certification from organizations such as ISO:9001, Carbon Footprint Label, Circular Mark

Chiwadi®

Founding Period : Concerned about the alarming rise in NCDs and the distortion of authentic Thai flavors due to unhealthy ingredients, Chiwada was established to produce health conscious products using coconut flower sap, preserving the true essence of Thai cuisine.

Vision & Management Principles : Chiwada aims to innovate health-focused food and beverages while educating people to meet global quality standards through knowledge and attention to detail.

Concept : Success comes from understanding the small things and fostering a genuine love for work. Sustainability relies on authenticity and the commitment of the network involved.

Product Distinction : Clinically studied, beneficial for diabetes prevention, boosts immunity, promotes health, and combines delicious taste with modern, stylish design.

Growing our business like a small person From seeing the problems of farmers in the NakhonChai Burin area (Nakhon Ratchasima, Chaiyaphum, Buriram, Surin) because Thailand is a world-class fruit center. But the problem of falling fruit prices always exists. And because my father taught me that "Don't waste it. It wastes oxygen." So we used our father's house number as the name of the company. We intend to select and process organic fruits into concentrated, premium grade health products. Retains natural flavor and aroma We intend to develop a manufacturing plant certified by FDA, GHPs, Codex, HACCP Codex, Halal and Green Industry standards, which does not create pollution from production.

We develop SME business in parallel with being a social business. By working with both the government, private and educational institutions. To transfer knowledge and promote income to the community as well as help develop both Thai and foreign markets.

Corner 43 Decor

Corner 43 Decor exemplifies the fusion of traditional craftsmanship with modern sustainability practices. Since its inception in 1987, the company has been at the forefront of transforming rattan, a versatile, renewable resource into elegant furniture that serves both function and fashion. Their commitment to design excellence is evident in their collaboration with skilled artisans and designers, resulting in pieces that are not only aesthetically pleasing but also embody the uniqueness and quality of handcrafted work.

Embracing innovation, Corner 43 Decor has expanded its material repertoire to include synthetic alternatives and recycled components. The integration of recycled materials, particularly through partnerships with organizations like Precious Plastic, showcases their dedication to environmental sustainability. The "Puzzle Collection" stands as a testament to this, where recycled bottle caps gain new life as part of stylish, durable furniture. Corner 43 Decor's journey towards Zero Waste is a commendable endeavor, highlighting their proactive approach to minimizing waste through thoughtful design and efficient material usage. By repurposing scraps into decorative items, they not only prevent waste but also add value to what would otherwise be discarded. Their innovative designs serve as a beacon of inspiration, encouraging a greater appreciation for sustainable practices in the design industry and beyond.

BON-BAN

est. 2023 | nst.

Early founding period : Established in 2023, starting with exhibiting at Bangkok Design Week 2023 together with the Design PLANT team. At that time it was just a mockup model to hear feedback from those who visited. To develop it into a business model that can actually be sold. After that, he received funding support from Walailak University. To set up this business so that it can actually happen and will be distributed for the first time in 2024

Vision : We are a business designing and distributing products for paying respects and making vows. The materials used must be environmentally friendly and useful after use.

Standards that the company has certified : Best Design of the DEmark 2024 (Design Excellence Award)

Concept : Solve the problem of regenerating waste caused by paying respects and making vows. In Mutelu places that are many and are like soft power of Thailand to have a better image.

The uniqueness of the product : It is a 100% biodegradable, earth-friendly votive chicken. There are also auspicious flower seeds inside and a strip for scratching lucky numbers on the side that is appropriate for Mutelu's behavior.

Innovations applied in the production process to promote exports : We use the production process in the recycled paper industry using the PULP MOLD method by a factory that has received ISO9000 standards.

Youtube : youtube.com/user/COTTOBrand

Siam Sanitary Ware Co., Ltd. was established in 1984 by the operations of The Siam Cement Public Company Limited, a leading global manufacturer of sanitary ware. The company aims to produce and distribute high-quality and aesthetically pleasing sanitary ware under the COTTO brand.

Quil Collection's Quinta Basin reflects the sophistication of Eastern culture, conveying both beauty and functionality through a design that embraces simplicity and natural elements. Inspired by the concept of Nature & Culture, the creation of its form draw inspiration from the banana leaf krathong, enriching it with the wisdom of ancient traditions. The art of folding banana leaves has been an integral part of Thai culture over time, and it has been translated into the design of the Quinta basin. This inspiration leads to unique design characteristics, with soft, gentle curves that convey comfort through lines. It's understated, gracefully elegant, and offers special color designs such as Serene White, Nimbus Gray, and Timeless Taupe, developed exclusively for this Quinta basin.

Cotto has developed a special ceramic clay formula that allows for thinner and lighter basin designs while maintaining the strength and durability of ceramic. This innovation also reduces gas consumption during firing, thereby lowering the carbon footprint of the production process. Even the packaging is designed to use less material and includes recycled paper, making it truly environmentally friendly that aligns with global sustainability direction.

IDIN ARCHITECTS

An acronym for Integrating Design Into Nature, IDIN Architects was founded in 2004 by Mr. Jeravej Hongsakul. IDIN perceives nature' in two ways. First, the ecology around us. Second, it also refer to different mannerisms and personalities. IDIN's design philosophy is to merge this sense of surroundings, the 'natures', to the architectural aesthetic, through a process of analyzing and prioritizing the different needs and requirements of each project.

The Thai word "idin" is used to describe the natural phenomenon when soil releases a beautiful scent after rainfall. This symbolizes

Thailand's tropical climate, something all IDIN designs aim to respond to. Our emphasis is placed not only on aesthetics, but also on being practical, in order to suit this temperate environment.

IDIN received several International awards e.g. Architizer A+ 2024, Arcasia Awards for Architecture 2021 and 2023, Golden Pin Design Award 2023, DFA Design for Asia Awards 2020 and 2023, Good Design Award 2021, the Prix Versailles South Asia and the Pacific 2020 and 2023, The Plan Award 2020, German Design Award 2018.

ABACUS digital Co., Ltd. , a DataTech company, was founded in 2017 with the goal of leveraging technology to address social issues by creating better financial opportunities for people and reducing social inequality in Thailand, especially for individuals with low credit scores who are currently burdened with informal debt.

To achieve this goal, the company launched "MoneyThunder" in 2019, a 100% online lending application. Users can apply for loans, withdraw, and make payments through the application 24/7. The key feature of MoneyThunder lies in the use of proprietary technology developed with an in-depth understanding of the Thai consumer market. This includes an AI system that analyzes risk and approves loans in as fast as two minutes, as well as a customer service system that uses a chatbot to assist users.

In addition to designing products and services that meet user needs, MoneyThunder also recognizes the importance of financial discipline and is committed to supporting and promoting financial literacy among its users through various channels.

Today, MoneyThunder has provided loan opportunities to Thai people, with over 20 million downloads. Notably, one-third of MoneyThunder users previously used informal loans, and more than 50% of users have experienced an improvement in income after receiving a loan. This success underscores our commitment to expanding financial access for Thai people.

Thaweephan Rice cracker was founded in 1994 by Mrs. Phannee Inprom, originally a housewife with excellent cooking skills. Her selection of high-quality ingredients made her crispy rice snacks fragrant, crispy, delicious, and clean, which everyone loved, leading to the creation of the brand "Thaweephan," derived from the names of the owners, Mr. Thaweewan and Mrs. Phannee.

Known for its flavor, fragrance, crispiness, and natural ingredients without preservatives or artificial colors, Thaweephan Rice cracker quickly became popular among health-conscious people and tourists, making it a signature souvenir of Lampang province. Thaweephan rice cracker also creates job opportunities for local villagers.

Today, Thaweephan rice cracker offers a variety of shapes and flavors, including square, small round, oval, donut, and ball shapes, with flavors such as original, sesame sugarcane, honey, and cheese. Its packaging extends the product's shelf life to one year. The quality has been certified by GMP, HACCP, and Halal, as well as receiving PM Awards and OTOP 5-star awards consecutively for five years.

If you are looking for a delicious and healthy traditional Thai snack made from Thai rice that is crispy, delicious, fresh, and clean, Please select "Thaweephan Rice cracker".

Chanthaburi Fruit Products Company Limited was established by Mr. Boonthieng Pruksakit and Mrs.Orachon Pruksakit, who are farmers in Chanthaburi Province since 1995 for the purpose of processing agricultural products from local fruits in Chanthaburi and nearby provinces, which an area where many good quality tropical fruits are grown. With a vision to be a leader in the agricultural product processing business. and expand market channels to be accepted under international food safety standards.

Our first products began with the production of deep fried durian and fruit paste, a food preservation process based on local wisdom. Later, food processing technology was introduced to help production. Both vacuum frying technology and freeze drying technology. As a result, our company currently has many products: crispy fried fruit, freeze-dried fruit, and fruit preserves under the brands "Boonthieng" and "Beefruits". Our products are certified to international food safety standards, including GHPs, ISO22000, HALAL, with products sold domestically through leading department stores in Thailand. It is also exported to foreign countries such as China, Malaysia, Philippines and America.

We are committed to developing Thai processed fruits in both quality and quantity to meet the needs of both domestic and international customers. Including improving the quality of life of Thai farmers.

During the Establishment of SAHAFARMS

Saha Farms was founded in 1969 by Dr. Panya Chotitawan, Thailand's leading expert in disease prevention and treatment. After dedicating himself to the civil service for over 23 years, Dr. Panya started a new journey by raising only 500 chickens per day and became the first pioneer in chicken export in Thailand.

Vision & Management

Saha Farms was founded by Dr. Panya's commitment to provide high-quality food to humanity. We have continuously developed the business until we became the leading frozen chicken exporter in Thailand. We have high attention to our products and services to ensure that consumers receive the best experience, while developing and maintaining the organization to be sustainable for the good quality of life of our employees.

Product Highlights

Our large, modern factory produces premium-grade chicken, with timely delivery adhering to the global standards. With expert butchery ensure every cut is delicately crafted.

Innovations

We use advanced machinery like Auto Final Control for sanitation, Auto Weighing for accurate packing, and solar energy to reduce our environmental impact.

LOUDIMENSION

Oudimension is an agarwood oil producer in Thailand to be certified by ISO9001:2015, ISO14001:2015, GMP, and Halal. For more than 4 decades of experience, at Oudimension, our vision is to be trusted globally and recognized internationally not only for our exclusive products but also for our focus on sustainable practices and our unwavering commitment to supporting our people, our communities and our partners.

Our mission is to combine the ancient art of agarwood cultivation and the age-old craft of agarwood oil distillation with an innovative approach to research and development in order to create the new range of agarwood products as diverse as perfume, agarwood chip, agarwood showpiece, agarwood powder, incense

tablet, and incense stick that achieve our goal "TO MAKE THE EXCLUSIVE SECRETS OF OUD AN INCLUSIVE PLEASURE OF DAILY LIFE"

Our factory uses the innovative distillery technology alongside artisanal craftsmanship to produce the finest agarwood oil. We control the process from raw material entry to the end of production. Furthermore, we are a zero-waste agarwood manufacturer. Most of our agarwood trees are sustainably grown on our very own plantations in Eastern Thailand. Since this species is protected, we make sure we grow our trees sustainably to ensure a steady supply and refrain from permanently harming the environment.
